

IR Beam 8

SWIR & NIR Friend or Foe

Product Instruction

1. Integrated 450mw near-infrared 980nm LED and 100mw short-wave infrared 1350nm LED.
2. It can be detected and identified by short-wave thermal imaging equipment in the air, such as photoelectric pods for hunting drones, pods for armed helicopters, and night vision devices for individual soldiers on the ground, to identify the situation of the enemy and ourselves. The short-wave infrared thermal signal generated by it cannot be detected by ordinary individual night vision devices, and can emit a signal light or a combined light signal. The signal light angle is 120 degrees.
3. The battery adopts CR123A, which can be quickly disassembled and replaced.
4. It can be directly attached to the tactical helmet for use.
5. IP67 waterproof.

Operation:

AB setting: A starts up; B turns off

0 Setting: short wave infrared constant light

1st Setting: short wave infrared flash

2nd Setting: short wave infrared and near infrared flashing at the same time
